

**QUE)** Write a shell script to display the process name and its process id.  
**SOLUTION)**

The screenshot shows a web browser window with a URL from cocalc.com. A red banner at the top contains a free trial notice. Below it, a code editor window titled 'abc1.sh' is open. The left pane shows the source code of the script, and the right pane shows the terminal output after running the script.

```
1 echo "process name is $0"
2 echo "process id is $$"
```

```
~$ bash -f abc1.sh
process name is abc1.sh
~$ bash -f abc1.sh
process name is abc1.sh
process id is 635
~$
```
